

BALUSTAT® – Excel-Tool

1. excel template, excel file

BALUSTAT® is designed as a template file. When a new calculation is created, a new file is created from the template.

Excel template: File name = BALUSTAT.xltm

Excel file: File name = BALUSTAT1.xlsm

Proceed as follows for correct use:

- Install BALUSTAT® correctly
(download .exe or .zip file from the website www.balustat.eu, execute installation)
- ⇒ The shortcut to BALUSTATv3 is displayed on your desktop

Carry out the calculation:

- CORRECT: right-click on the desktop icon, select "New".
- ⇒ BALUSTAT® creates a new Excel file from the template.

or:

- CORRECT:
 - Windows Start menu
 - Select the «Roffler Ingenieure» entry
 - Select BALUSTATv3
- ⇒ BALUSTAT® creates a new Excel file from the template.

But:

- WRONG: right-click on the desktop icon and select "Open".
- ⇒ BALUSTAT® opens the document template that is not to be changed. Depending on the input and saving, the following message is displayed:
